

Libby Lebyane

FinTech Software Developer

(064) 204 – 0465

lebyane.lm@gmail.com / [View Portfolio](#)

Johannesburg, Gauteng

PROFESSIONAL SUMMARY

Self-taught full Stack Developer with strong experience in designing, building, and deploying scalable web applications. Proficient in backend architecture using Python and Node.js, and frontend development with Angular and React. Experienced in RESTful API development, database design (SQL & MongoDB), cloud deployment (AWS), and DevOps practices including CI/CD and server management. Focused on performance optimization, clean architecture, and production-grade and maintainable code.

TECHNICAL SKILLS

Languages:

- Python
- JavaScript (ES6+)
- TypeScript
- SQL

Frontend:

- Angular
- React
- HTML5
- CSS3
- Responsive Design
- State Management
- UI/UX

Backend:

- Node.js (Express.js)
- Python (Flask)
- Rest API Design
- Authentication (JWT, OAuth)
- WebSockets

Database:

- PostgreSQL / MySQL / Redis
- MongoDB
- Google Firestore

DevOps:

- Cloud Services (AWS, EC2, S3, RDS, Lambda, DigitalOcean, GoDaddy)
- Docker
- CI/CD Pipelines
- Linux Administration
- NGINX
- Git, JIRA, Trello

CORE SKILLS

- Adaptability
- Attention to detail
- Critical thinking
- Hard-worker
- Emotional intelligence
- Punctuality
- Problem solving
- Email correspondences
- Agile project management (SCRUM)

PERSONAL PROJECTS

My Portfolio — Full Project Showcase

GitHub: [Reference](#)

- Designed and developed a clean, user-friendly portfolio website to showcase my technical projects and achievements.
- Implemented responsive layouts and intuitive navigation to highlight key project details and repositories.
- Emphasized design aesthetics and clarity to create a professional presentation of skills and work.
- **Tech stack:** Angular, HTML, CSS.

Hetchfund — Crowdfunding for Start-ups

GitHub: [Reference](#) (Frontend), [Reference](#) (Backend)

- Built a full-stack crowdfunding platform enabling startups to raise capital through online donations.
- Integrated secure payment processing using Yoco APIs.
- Designed the platform's social discovery features allowing users to browse, share, and support startup campaigns.
- Developed both frontend and backend systems, including application logic, data handling, and user-facing interfaces.
- Implemented KYC (Know-Your-Customer) workflow via SmileID.
- **Tech stack:** Python, REST APIs, Angular, MongoDB, HTML, CSS.

Nextify — Restaurant management platform

GitHub: [Reference](#) (Frontend), [Reference](#) (Backend)

- Designed and developed a platform enabling local restaurants to scale toward franchise-level operations and support online ordering.
- Built a full-stack restaurant management platform supporting order tracking, menu management, and operational administration.
- Developed backend REST services in Node.js and integrated a MongoDB database for structured data storage.
- Responsive frontend using Angular, HTML, and CSS, enabling efficient management of restaurant operations.
- Developed a reproducible mobile app template as per restaurant partner.
- **Tech stack:** Node.js, REST APIs, Angular, MongoDB, HTML, CSS.

Gift of Health — Clinic doctor patient app

- Developed a clinic management and patient services app to streamline healthcare operations.
- Enabled patients to book and manage appointments with doctors and specialists.
- Allowed patients to upload prescriptions and medical documents securely.
- Centralized administrative functions to reduce manual processes and improve record accessibility.
- Developed a reproducible mobile app template as per restaurant partner.
- **Tech stack:** React, Flask, PostgreSQL, Twilio (notifications), AWS, REST APIs.

EDUCATION

Advanced Diploma in Economics (2025)

Tshwane University of Technology — **Completed**

- Achieved a 64% overall average, demonstrating solid academic performance across assessed coursework.
- Developed applied research skills, including data collection, evaluation, and synthesis.
- Acquired economic modeling competencies, including Ordinary Least Squares (OLS) and regression analysis.
- Gained experience drafting structured results reports to clearly present and interpret empirical findings.

Diploma in Economics (2022 – 2024)

Tshwane University of Technology — **Completed**

- Obtained a distinction in econometrics and 72% in statistics.
- Demonstrated strong proficiency in computer skills with 84%.
- Participated in campus chess extracurricular activities.
- Average overall of 64% for exit level subjects on average.

National Senior Certificate (2018)

*Tsoseletso Ya Afrika Secondary School — **Completed***

Standard Bank:Digital Literacy Certificate (2024)

*ICT ED: Short Course — **Completed***

- Foundational knowledge on usage of the Microsoft suite of apps.
- Built on top of exceptional knowledge of computer skills and document formatting.
