PERSONAL PROFILE

A 3rd-year, soon-to-graduate student from Tshwane University of Technology studying a Diploma in Economics. Self-taught with passion and a good understanding of software development, attentive to details, hyper-focused, adaptable, problem-solver, and creative, bringing a unique combination of skills of finance and software development.

TECHNICAL EXPERIENCE

Frontend web development

Angular and React

- Proficient in building single-page applications (SPAs).
- Implementing data binding, routing, and dependency injection in Angular applications.
- Use of TypeScript to implement types and interfaces.
- State management uses React Hooks and Redux for efficient data handling.

Backend web development and general-purpose programming

Python and Node.js

- Use of Python libraries such as NumPy, Pandas, and Matplotlib for statistical presentations.
- Building RESTful APIs using frameworks like Express.js, and Flask.
- Package management using both NPM, yarn, and pip.
- Deploying and managing the life cycle of web servers with Linux systems.

Project management and version control

GitHub and Git

- Proficiency in version control practices using git.
- Good understanding of the git CLI commands.
- Easy adaptability of other version control platforms, such as BitBucket.

Developer operations and post-development

Nginx, Apache, Docker CLI, Terminal, and Bash

- Foundational knowledge of web server management with NGINX or Apache.
- Ability to use technologies such as Docker CLI to publish codebases to production environments.
- Strong usage and understanding of terminal commands and developing bash scripts for automations.
